Rain Alarm Project is a simple but very useful project that detects Rain (Rain Water) and automatically triggers an alarm or buzzer. Water is a basic need in every one's life. Saving water and proper usage of water is very important. Here is an easy project which will give the alarm when there is rain, so that we can make some actions for rain water harvesting and also save the rain water for using it later. With the help of saving this main water through rain water harvesting, we can increase the levels of underground water by using underwater recharge technique. Rain water detector will detect the rain and make an alert; rain water detector is used in the reliable circuit of rain water detector which can be constructed at low cost irrigation field, home automation, communication, automobiles etc. Here is the simple and irrigation field, home automation, communication, automobiles etc.

The entitle of is project "RAIN ALARM WITH CLOSING FACILITY" project is essential for fertilizer and cottage industries. The main purpose the project is to avoid mental stress and to the prevent material from rain. This is project can construct easily using simple electronics component

#### Abstract

#### Gymnema sylverstre Incorporated Foods For Diabetes Mellitus

Kadam Vaishnavi Dnyeshwar, Shraddhe Vaishnavi RameshGhodke, Sujit Shashikant

Diabetes is defined as a group of metabolic disorder of multiple etiologies characterized by chronic hyperglycemia with disturbances of carbohydrate, fat and protein metabolism resulting from defects in insulin secretion and insulin action. *Gymnema sylvestre* supplementation appears to improve glycemic control in patients with type 2 diabetes.

Phytochemical side intified from traditional medicinal plants are presenting an opportunity for the development of new type of therapeutics for diabetes. Madhunasini (*Gymnema sylvestre*) is a plantused for the disease of hyperglycemia. *Gymnema* leaves contain gymnemic acid which is known to suppress the transport of glucose from the intestine in to the blood stream. Therefore reducing the complication from diabetes. Based on these facts a study was under taken to formulation of *Gymnema sylvestre* corporate foods for diabetes mellitus
