7.1.3 The facilities in the Institution for the management of the following types of degradable and non-degradable waste

❖ Solid waste management–

Our college is always ready to keep the college premises clean. In the college, there are dustbins in each department and dustbins are kept on each floor of the college, classified as wet and dry waste. A notice board regarding waste has also been installed. In order not to harm the environment, the students of the college are made aware of the garbage, for that they are banned from using plastic bottles, plastic bags, etc. in the college. Therefore, the college campus is a plastic free area, thus the waste from the college is given in the garbage vehicle of the Gram Panchayat of the village and the waste is disposed off. For the solid waste there is vermicomposting in college

❖ Hazardous waste management:

Chemicals & radioactive waste management for liquid waste, the college has constructed separate septic tanks in which the chemical water and other liquid wastes from the practical in the lab are left in the septic tanks.

❖ E-waste management:

The college uses various types of electronic gadgets such as computers, printers, LCD projector etc. All E-waste in the college is collected at one place. This E-waste includes damaged computer parts, scanners, printers, DVDs, Empty Toner, expired computers and other electronic items etc.

❖ Liquid-waste management:

It is proper in the planning of waste water through the drainage pipe into Safety tank of the college itself.

Varmi compost for waste recycling system
